## [The AccuDyne AC Dynamometer system now available for wind power applications](#)

Posted 2013-04-03 20:41 by **John**

A developer of implementation of instrumentation products for dynamometer testing, SAKOR Technologies, Inc., recently announced the availability of its [complete](#) AccuDyne AC Dynamometer [system](#) for [wind power](#) testing applications. The system can be used by multiple engineering groups to test and verify designs, as well as for quality control testing after manufacturing.
